Write the model and serial numbers here:

Model # __________________________
Serial # __________________________

You can find them on a label when the door is open.
IMPORTANT SAFETY INSTRUCTIONS.
READ ALL INSTRUCTIONS BEFORE USING.

⚠️ WARNING: To reduce the risk of fire, burns, electric shock, injury to persons or exposure to excessive microwave energy when using your appliance, follow basic precautions, including the following sections.

<table>
<thead>
<tr>
<th>PRECAUTIONS TO AVOID POSSIBLE EXPOSURE TO EXCESSIVE MICROWAVE ENERGY</th>
</tr>
</thead>
<tbody>
<tr>
<td>(a) <strong>Do Not Attempt</strong> to operate this oven with the door open since this operation can result in harmful exposure to microwave energy. It is important not to defeat or tamper with the safety interlocks.</td>
</tr>
<tr>
<td>(b) <strong>Do Not Place</strong> any object between the oven front face and the door or allow soil or cleaner residue to accumulate on sealing surfaces.</td>
</tr>
<tr>
<td>(c) <strong>Do Not Operate</strong> the oven if it is damaged. It is particularly important that the oven door close properly and that there is no damage to the:</td>
</tr>
<tr>
<td>(1) door (bent),</td>
</tr>
<tr>
<td>(2) hinges and latches (broken or loosened),</td>
</tr>
<tr>
<td>(3) door seals and sealing surfaces.</td>
</tr>
<tr>
<td>(d) <strong>The Oven Should Not</strong> be adjusted or repaired by anyone except properly qualified service personnel.</td>
</tr>
</tbody>
</table>

SAFETY PRECAUTIONS.

This microwave oven is cUL listed for installation over electric and gas ranges.
This microwave oven is not approved or tested for marine use.

1. Read all instructions before using the appliance.
2. Read and follow the specific "Precautions to Avoid Possible Exposure to Excessive Microwave Energy" found above.
3. As most cooking appliances, close supervision is necessary to reduce the risk of a fire in the oven cavity.
4. To reduce the risk of fire in the oven cavity:
   i) Do not overcook food. Carefully attend appliance if paper, plastic or other combustible materials are placed inside the oven while cooking.
   ii) Remove wire twist-ties and metal handles from paper or plastic containers/bags before placing them in the oven.
   iii) If materials inside the oven ignite, keep the oven door closed. Turn the oven off and unplug the appliance. Disconnect the power cord, shut off power at the fuse or circuit breaker panel.
   iv) Do not use the oven for storage purposes. Do not leave paper products, cooking utensils or food in the oven when not in use.
5. This oven must be grounded. Connect only to properly grounded outlet. See "Grounding Instructions" found on page 6.
6. Install or locate this oven only in accordance with the provided installation instructions provided.
7. Some products such as whole eggs and sealed containers - for example, closed glass jars - are able to explode and should not be heated in this oven.
8. Use this appliance only for its intended use as described in this manual. Do not use corrosive chemicals or vapors in this appliance. This microwave oven is specifically designed to heat, dry or cook food, and is not intended for industrial or laboratory use.
9. As with any appliance, close supervision is necessary when used by children.
10. Do not operate this oven if it has a damaged cord or plug, if it is not working properly, or if it has been damaged or dropped.
11. This appliance should be serviced only by qualified service technicians. Contact the nearest authorized service facility for examination, repair or adjustment.
12. Do not cover or block any openings on the oven.
13. Do not store this appliance outdoors.
14. Do not use this oven near water – for example, near a kitchen sink, in a wet basement, near a swimming pool, or similar locations.

SAVE THESE INSTRUCTIONS
15. Do not immerse cord or plug in water.
16. Keep cord away from heated surfaces.
17. Do not let cord hang over edge of table counter.
18. When cleaning surfaces of door and oven that comes together on closing the door, use only mild, non abrasive soaps or detergents applied with a sponge or cloth.
19. Liquids, such as water, coffee or tea are able to be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A SPOON OR OTHER UTENSIL IS INSERTED INTO THE LIQUID.

**SPECIAL NOTES ABOUT MICROWAVING**

**ARCING**

If you see arcing, press the CLEAR/OFF pad and correct the problem.

Arcing is the microwave term for sparks in the oven. Arcing is caused by:

- Metal or foil touching the side of the oven.
- Foil not molded to food (upturned edges act like antennas).
- Metal, such as twist-ties, poultry pins, or gold-rimmed dishes, in the microwave.
- Recycled paper towels containing small metal pieces being used in the microwave.

**FOODS**

- Do not pop popcorn in your microwave oven unless in a special microwave popcorn accessory dish or unless you use popcorn labeled for use in microwave ovens.
- Some products such as whole eggs and sealed containers – for example, closed jars – are able to explode and should not be heated in this microwave oven. Heating these products in the microwave oven could result in injury.
- Do not boil eggs in a microwave oven. Pressure will build up inside egg yolk and will cause it to burst, possibly resulting in injury.
- Operating the microwave with no food inside for more than a minute or two may cause damage to the oven and could start a fire. It increases the heat around the magnetron and can shorten the life of the oven.
- Foods with unbroken outer “skin” such as potatoes, hot dogs, sausages, tomatoes, apples, chicken livers and other giblets, and egg yolks should be pierced to allow steam to escape during cooking.

**SUPERHEATED WATER**

Liquids, such as water, coffee or tea, are able to be overheated beyond the boiling point without appearing to be boiling. Visible bubbling or boiling when the container is removed from the microwave oven is not always present. THIS COULD RESULT IN VERY HOT LIQUIDS SUDDENLY BOILING OVER WHEN THE CONTAINER IS DISTURBED OR A SPOON OR OTHER UTENSIL IS INSERTED INTO THE LIQUID.
IMPORTANT SAFETY INSTRUCTIONS.
READ ALL INSTRUCTIONS BEFORE USING.

- Avoid heating baby food in glass jars, even with the lid off. Make sure all infant food is thoroughly cooked. Stir food to distribute the heat evenly. Be careful to prevent scalding when warming formula or breast milk. The container may feel cooler than the milk really is. Always test the milk before feeding the baby.

- Spontaneous boiling – Under certain special circumstances, liquids may start to boil during or shortly after removal from the microwave oven. To prevent burns from splashing liquid, we recommend the following: before removing the container from the oven, allow the container to stand in the oven for 30 to 40 seconds after the oven has shut off. Do not boil liquids in narrownecked containers such as soft drink bottles, wine flasks and especially narrow-necked coffee cups. Even if the container is opened, excessive steam can build up and cause it to burst or overflow.

- Don’t defrost frozen beverages in narrownecked bottles (especially carbonated beverages). Even if the container is opened, pressure can build up. This can cause the container to burst, possibly resulting in injury.

- Hot foods and steam can cause burns. Be careful when opening any containers of hot food, including popcorn bags, cooking pouches and boxes. To prevent possible injury, direct steam away from hands and face.

- Do not overcook potatoes. They could dehydrate and catch fire, causing damage to your oven.

- Cook meat and poultry thoroughly – meat to at least an INTERNAL temperature of 160°F (71° C) and poultry to at least an INTERNAL temperature of 180°F (82° C). Cooking to these temperatures usually protects against foodborne illness.

MICROWAVE-SAFE COOKWARE

Make sure all cookware used in your microwave oven is suitable for microwaving. Most glass casseroles, cooking dishes, measuring cups, custard cups, pottery or china dinnerware which does not have metallic trim or glaze with a metallic sheen can be used. Some cookware is labeled “suitable for microwaving.”

- If you are not sure if a dish is microwave-safe, use this test: Place in the oven both the dish you are testing and a glass measuring cup filled with 1 cup (240 mL) of water – set the measuring cup either in or next to the dish. Microwave 1 minute at high. If the dish heats, it should not be used for microwaving. If the dish remains cool and only the water in the cup heats, then the dish is microwave-safe.

- If you use a meat thermometer while cooking, make sure it is safe for use in microwave ovens.

- Do not use recycled paper products. Recycled paper towels, napkins and waxed paper can contain metal flecks which may cause arcing or ignite. Paper products containing nylon or nylon filaments should be avoided, as they may also ignite.

- Some styrofoam trays (like those that meat is packaged on) have a thin strip of metal embedded in the bottom. When microwaved, the metal can burn the floor of the oven or ignite a paper towel.

- Do not use the microwave to dry newspapers.

- Not all plastic wrap is suitable for use in microwave ovens. Check the package for proper use.

- Paper towels, waxed paper and plastic wrap can be used to cover dishes in order to retain moisture and prevent spattering. Be sure to vent plastic wrap so steam can escape.

- Cookware may become hot because of heat transferred from the heated food. Pot holders may be needed to handle the cookware.

- “Boilable” cooking pouches and tightly closed plastic bags should be slit, pierced or vented as directed by package. If they are not, plastic could burst during or immediately after cooking, possibly resulting in injury. Also, plastic storage containers should be at least partially uncovered because they form a tight seal. When cooking with containers tightly covered with plastic wrap, remove covering carefully and direct steam away from hands and face.

SAVE THESE INSTRUCTIONS
Use foil only as directed in this manual. TV dinners may be microwaved in foil trays less than 3/4" (1.9 cm) high; remove the top foil cover and return the tray to the box. When using foil in the microwave oven, keep the foil at least 1" (2.5 cm) away from the sides of the oven.

Plastic cookware – Plastic cookware designed for microwave cooking is very useful, but should be used carefully. Even microwave-safe plastic may not be as tolerant of overcooking conditions as are glass or ceramic materials and may soften or char if subjected to short periods of overcooking. In longer exposures to overcooking, the food and cookware could ignite.

Follow these guidelines:
1. Use microwave-safe plastics only and use them in strict compliance with the cookware manufacturer’s recommendations.
2. Do not microwave empty containers.
3. Do not permit children to use plastic cookware without complete supervision.

THE VENT FAN

Take care to prevent the starting and spreading of accidental cooking fires while the vent fan is in use.

Clean the underside of the microwave often. Do not allow grease to build up on the microwave or the fan filters.

In the event of a grease fire on the surface units below the microwave oven, smother a flaming pan on the surface unit by covering the pan completely with a lid, a cookie sheet or a flat tray.

Use care when cleaning the vent fan filters. Corrosive cleaning agents, such as lye-based oven cleaners, may damage the filters.

When preparing flaming foods under the microwave, turn the fan on.

Never leave surface units beneath your microwave oven unattended at high heat settings. Boilovers cause smoking and greasy spillovers that may ignite and spread if the microwave vent fan is operating. To minimize automatic fan operation, use adequate sized cookware and use high heat on surface units only when necessary.

RADIO INTERFERENCE

Operation of the microwave oven may cause interference to your radio, TV or similar equipment.

When there is interference, it may be reduced or eliminated by taking the following measures:
1. Clean door and sealing surface of the oven.
2. Reorient the receiving antenna of radio or television.
3. Relocate the microwave oven with respect to the receiver.
4. Move the microwave oven away from the receiver.
5. Plug the microwave oven into a different outlet so that microwave oven and receiver are on different branch circuits.
IMPORTANT SAFETY INFORMATION.
READ ALL INSTRUCTIONS BEFORE USING.

GROUNDING INSTRUCTIONS

⚠️ WARNING: Improper use of the grounding plug can result in a risk of electric shock.

This appliance must be grounded. In the event of an electrical short circuit, grounding reduces the risk of electric shock by providing an escape wire for the electric current.

This appliance is equipped with a power cord having a grounding wire with a grounding plug. The plug must be plugged into an outlet that is properly installed and grounded.

Consult a qualified electrician or service technician if the grounding instructions are not completely understood, or if doubt exists as to whether the appliance is properly grounded.

If the outlet is a standard 2-prong wall outlet, it is your personal responsibility and obligation to have it replaced with a properly grounded 3-prong wall outlet.

Do not under any circumstances cut or remove the third (ground) prong from the power cord.

Do not use an adapter plug with this appliance.

Do not use an extension cord with this appliance.

If the power cord is too short, have a qualified electrician or service technician install an outlet near the appliance.

For best operation, plug this appliance into its own electrical outlet to prevent flickering of lights, blowing of fuse or tripping of circuit breaker.

SAVE THESE INSTRUCTIONS
Throughout this manual, features and appearance may vary from your model.

**Features**

1. **Door Handle.** Pull to open the door. The door must be securely latched for the microwave to operate.

2. **Door Latches.**

3. **Window with Metal Shield.** Screen allows cooking to be viewed while keeping microwaves confined in the oven.

4. **Touch Control Panel.** You must set the clock before using the microwave.

5. **Cooktop Lights.**

6. **Grease Filters.**

7. **Removable Turntable.** Turntable and support must be in place when using the oven. The turntable may be removed for cleaning.

**NOTE:** Rating plate, oven vent(s) and oven light are located on the inside walls of the microwave oven.
The Controls on Your Microwave Oven

Throughout this manual, features and appearance may vary from your model.

You can microwave by time or with the convenience features.

Changing Power Levels

How to Change the Power Level

The power level may be entered or changed immediately after entering the feature time for TIME COOK. The power level may also be changed during time countdown.

1. Press TIME COOK.
2. Enter cooking time.
3. Press POWER LEVEL.
4. Select desired power level 1–10.
5. Press START.

Variable power levels add microwave flexibility to microwave cooking. The power levels on the microwave oven can be compared to the surface units on a range. High (power level 10) or full power is the fastest way to cook. Each power level gives you microwave energy a certain percent of the time. Power level 7 is microwave energy 70% of the time. Power level 3 is energy 30% of the time.

A high setting (10) will cook faster but food may need more frequent stirring, rotating or turning over. Most cooking will be done on High (power 10). A lower setting will cook more evenly and need less stirring or rotating of the food.

Some foods may have better flavor, texture or appearance if one of the lower settings is used. Use a lower power level when cooking foods that have a tendency to boil over, such as scalloped potatoes.

Rest periods (when the microwave energy cycles off) give time for the food to “equalize” or transfer heat to the inside of the food. An example of this is shown with power level 3 – the defrost cycle. If microwave energy did not cycle off, the outside of the food would cook before the inside was defrosted.

Here are some examples of uses for various power levels:

<table>
<thead>
<tr>
<th>Power Level</th>
<th>Best Uses</th>
</tr>
</thead>
<tbody>
<tr>
<td>High 10</td>
<td>Fish, bacon, vegetables, boiling liquids.</td>
</tr>
<tr>
<td>Med-High 7</td>
<td>Gentle cooking of meat and poultry; baking casseroles and reheating.</td>
</tr>
<tr>
<td>Medium 5</td>
<td>Slow cooking and tenderizing such as stews and less tender cuts of meat.</td>
</tr>
<tr>
<td>Low 3</td>
<td>Defrosting without cooking; simmering; delicate sauces. Warm 1 Keeping food warm without overcooking; softening butter.</td>
</tr>

</table>
Time Features

Time Cook

1. Press **TIME COOK**.
2. Enter cooking time.
3. Change power level if you don't want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
4. Press **START**.

**Time Cook I**

Allows you to microwave for any time up to 99 minutes and 99 seconds.

Power 10 [High] is automatically set, but you may change it for more flexibility.

You may open the door during Time Cook to check the food. Close the door and press **START** to resume cooking.

**Time Cook II**

Lets you change power levels automatically during cooking. Here’s how to do it:

1. Press **TIME COOK**.
2. Enter the first cook time.
3. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
4. Press **TIME COOK**.
5. Enter the second cook time.
6. Change the power level if you don’t want full power. (Press **POWER LEVEL**. Select a desired power level 1–10.)
7. Press **START**.

At the end of Time Cook I, Time Cook II counts down.
# Time Features

## Cooking Guide for Time Cook I & II

**NOTE:** Use power level High (10) unless otherwise noted.

Time Features

Time Defrost

1. Press DEFROST AUTO/TIME twice.
2. Enter defrosting time.
3. Press START.
4. Turn food over when the oven signals.
5. Press START.

(Auto Defrost explained in the section on Quick Touch Features.)

Allows you to defrost for the length of time you select. See the Defrosting Guide for suggested times.

Power 3 is automatically set, but you may change this for more flexibility. You may defrost small items more quickly by raising the power level after entering the time. However, they will need more frequent attention than usual.

At one half of selected defrosting time, the oven signals TURN. At this time, turn food over and break apart or rearrange pieces for more even defrosting. Shield any warm areas with small pieces of foil.

A dull thumping noise may be heard during defrosting. This sound is normal when the oven is not operating at High power.

Defrosting Tips

- Foods frozen in paper or plastic can be defrosted in the package. Tightly closed packages should be slit, pierced or vented AFTER food has partially defrosted. Plastic storage containers should be at least partially uncovered.

- Family-size, prepackaged frozen dinners can be defrosted and microwaved. If the food is in a foil container, transfer it to a microwave-safe dish.

- Foods that spoil easily, such as milk, eggs, fish, stuffings, poultry and pork, should not be allowed to sit out for more than one hour after defrosting. Room temperature promotes the growth of harmful bacteria.

- For more even defrosting of large foods, such as beef, lamb and veal roasts, use Auto Defrost.

- Be sure large meats are completely defrosted before cooking.

- When defrosted, food should be cool but softened in all areas. If still slightly icy, return to the microwave very briefly, or let it stand a few minutes.

Time Features

Express Cook

This is a quick way to set cooking time for 1–6 minutes.

Press one of the Express Cook pads (from 1 to 6) for 1 to 6 minutes of cooking at power level 10. For example, press the 2 pad for 2 minutes of cooking time.

The power level can be changed as time is counting down. Press POWER LEVEL and enter 1-10.

Add 30 Seconds

You can use this feature two ways:

- It will add 30 seconds to the time counting down each time the pad is pressed.
- It can be used as a quick way to set 30 seconds of cooking time.

Note: This function does not apply to the Defrost and Express Cook functions.
Quick Touch Features

**Beverage**

1. The Beverage feature heats 1 to 3 servings of any beverage.
2. Press BEVERAGES. The oven starts immediately. The serving size is automatically set at 1, but you may change it for more flexibility (see Table A).
3. Press START.

Drinks heated with the Beverage feature may be very hot. Remove the container with care.

**Popcorn**

*How to Use the Popcorn Feature*

1. Follow package instructions, using Time Cook if the package is less than 1.75 ounces (50 g) or larger than 3.5 ounces (100 g). Place the package of popcorn in the center of the microwave.
2. Press POPCORN. The oven starts immediately. Tap POPCORN to select the bag size you are cooking (see Table A).
3. Press START.

**Important:**

Never leave the microwave oven unattended during the cooking of popcorn.

**Important:**

Light Popcorn does not contain as much cooking ingredients (oil, butter, etc) as Regular type popcorn, so cooking time will be substantially reduced. When the popping action slows down or stops, stop the microwave oven immediately, otherwise the popcorn will overcook, burn and possibly catch on fire.

**Reheat**

1. The Reheat feature heats 1 to 3 servings of food (8 Oz = 1 serving).
2. Press REHEAT. The serving size is automatically set at 1, but you may change it for more flexibility (see Table A).
3. Press START.

**Baked Potato**

1. The Potato feature heats 1 to 3 servings of any potato.
2. Press BAKED POTATO. The serving size is automatically set at 1, but you may change it for more flexibility (see Table A).
3. Press START.
Auto Features

Auto Defrost

1. Press DEFROST AUTO/TIME once.
2. Using the Conversion Guide below, enter food weight. For example, press pads 1 and 2 for 1.2 pounds (1 pound, 3 ounces/544 g).
3. Press START.
   (Time Defrost is explained in the Time Features section.)

The Defrost Auto/Time feature gives you two ways to defrost frozen foods. Press DEFROST AUTO/TIME once for Auto Defrost or twice for Time Defrost. Use Auto Defrost for meat, poultry and fish. Use Time Defrost for most other frozen foods. Auto Defrost automatically sets the defrosting times and power level to give even defrosting results for meats, poultry and fish weighing up to six pounds.

Conversion Guide

If the weight of food is stated in pounds and ounces, the ounces must be converted to tenths (.1) of a pound.

</table>

- Remove meat from package and place on microwave-safe dish.
- After defrosting, most meats need to stand 5 minutes to complete defrosting. Large roasts should stand for about 30 minutes.
**Other Features**

**Cooking Complete Reminder**
To remind you that you have food in the oven, the oven will beep five times.

**Clock**
Press to enter the time of day or to check the time of day while microwaving.

1. Press CLOCK.
2. Press CLOCK to select AM or PM.
3. Enter time of day.
4. Press CLOCK.

**Timer On/Off**
When time is up, the oven will signal and display “OFF”. To turn off the timer signal, press TIMER ON/OFF.

1. Press TIMER ON/OFF.
2. Enter time you want.
3. Press TIMER ON/OFF to start.

**NOTE:** The timer indicator will be lit while the timer is operating.

**Start/Pause**
In addition to starting many functions, START/PAUSE allows you to stop cooking without opening the door or clearing the display.

**Child Lock-Out**
You may lock the control panel to prevent the microwave from being accidentally started or used by children.

To lock or unlock the controls, press and hold CLEAR/OFF for about three seconds. When the control panel is locked, a lock symbol will be displayed.

**Vent Fan**
The vent fan removes steam and other vapors from surface cooking.

An automatic fan feature protects the microwave from too much heat rising from the cooktop below it. It automatically turns on at low speed if it senses too much heat. If you have turned the fan on you may find that you cannot turn it off. The fan will automatically turn off when the internal parts are cool. It may stay on for 30 minutes or more after the cooktop and microwave controls are turned off.

**Surface Light**
Press SURFACE LIGHT to turn the surface light on or off.
# Microwave Terms

<table>
<thead>
<tr>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
</table>
| Arcing    | Arcing is the microwave term for sparks in the oven. Arcing is caused by:  
  - metal or foil touching the side of the oven.  
  - foil that is not molded to food (upturned edges act like antennas).  
  - metal such as twist-ties, poultry pins, gold-rimmed dishes.  
  - recycled paper towels containing small metal pieces. |
| Covering  | Covers hold in moisture, allow for more even heating and reduce cooking time. Venting plastic wrap or covering with wax paper allows excess steam to escape. |
| Shielding | In a regular oven, you shield chicken breasts or baked foods to prevent over-browning. When microwaving, you use small strips of foil to shield thin parts, such as the tips of wings and legs on poultry, which would cook before larger parts. |
| Standing Time | When you cook with regular ovens, foods such as roasts or cakes are allowed to stand to finish cooking or to set. Standing time is especially important in microwave cooking. Note that a microwaved cake is not placed on a cooling rack. |
| Venting   | After covering a dish with plastic wrap, you vent the plastic wrap by turning back one corner so excess steam can escape. |
Helpful Hints
Open the over door a few minutes after cooking to air out the inside. An occasional thorough wiping with a solution of baking soda and water keeps the inside fresh. 

NOTE: Be certain the power is off before cleaning any part of this oven.

How to Clean the Inside

Walls, Floor, Inside Window, Metal and Plastic Parts on the Door
Some spatters can be removed with a paper towel, others may require a damp cloth. Remove greasy spatters with a sudsy cloth, then rinse with a damp cloth. Do not use abrasive cleaners or sharp utensils on oven walls.

Never use a commercial oven cleaner on any part of your microwave.

Removable Turntable and Turntable Support
To prevent breakage, do not place the turntable into water just after cooking. Wash it carefully in warm, sudsy water or in the dishwasher. The turntable and support can be broken if dropped. Remember, do not operate the oven without the turntable and support in place.

How to Clean the Outside

Do not use cleaners containing ammonia or alcohol on the microwave oven. Ammonia or alcohol can damage the appearance of the microwave.

Outer Case
Clean the outside of the microwave with a sudsy cloth. Rinse and then dry. Wipe the window clean with a damp cloth.

Control Panel and Door
Wipe with a damp cloth. Dry thoroughly. Do not use cleaning sprays, large amounts of soap and water, abrasives or sharp objects on the panel – they can damage it. Some paper towels can also scratch the control panel.

Door Surface
It’s important to keep the area clean where the door seals against the microwave. Use only mild, nonabrasive detergents applied with a clean sponge or soft cloth. Rinse well.

Bottom
Clean off the grease and dust on the bottom often. Use a solution of warm water and detergent.

Stainless Steel (on some models)
Do not use a steel-wool pad; it will scratch the surface.
To clean the stainless steel surface, use a hot, damp cloth with a mild detergent suitable for stainless steel surfaces. Use a clean, hot, damp cloth to remove soap. Dry with a dry clean cloth. If food soil remains, try a general kitchen cleaner.
For hard-to-clean soil, use a standard stainless-steel cleaner, such as Bon-Ami® or Cameo®. Apply cleaner with a damp sponge. Use a clean, hot, damp cloth to remove cleaner. Dry with a dry clean cloth. Always scrub lightly in the direction of the grain.
After cleaning, use a stainless steel polish, such as Stainless Steel Magic®, Revere Copper and Stainless Steel Cleaner® or Wenol All Purpose Metal Polish®. Follow the product instructions for cleaning the stainless steel surface.
Light Bulb Replacement

**Cooktop Lights**

Replace the burned-out bulb with a 40-watt incandescent bulb (WB36X10003), available from your local parts store.

1. To replace the bulb(s), first disconnect the power at the main fuse or circuit breaker panel or pull the plug.
2. Remove the screw at the front of the light cover and lower the cover.
3. Be sure the bulb(s) to be replaced are cool before removing. After breaking the adhesive seal, remove the bulb by gently turning.
4. Replace the screw. Connect electrical power to the oven.

**Oven Light**

Replace the burned-out bulb with a 40-watt incandescent bulb (WB36X10003), available from your local parts store.

1. To replace the oven light, first disconnect the power at the main fuse or circuit breaker panel or pull the plug.
2. Remove the grille by taking out the 2 screws that hold it in place.
3. Next, remove the screw located above the door near the center of the oven that secures the light housing.
4. Replace the screw. Connect electrical power to the oven.

The Exhaust Feature

**The Vent Fan**

The vent fan has 2 metal reusable grease filters. Models that recirculate air back into the room also use a charcoal filter.

**Reusable Grease Filters**

The metal filters trap grease released by foods on the cooktop. They also prevent flames from foods on the cooktop from damaging the inside of the microwave.

For this reason, the filters must ALWAYS be in place when the hood is used. The grease filters should be cleaned once a month, or as needed.
The Exhaust Feature

Removing and Cleaning the Filter

To remove, slide it to the left/right using the tab. Pull it down and out.

To clean the grease filter, soak it and then swish it around in hot water and detergent. Don’t use ammonia or ammonia products because they will darken the metal. Light brushing can be used to remove embedded dirt.

To replace, slide the filter in the frame slot on the left/right of the opening. Pull up and to the left/right to lock into place.

Rinse, shake and let it dry before replacing.

Charcoal Filter (on some models)

The charcoal filter cannot be cleaned. It must be replaced.

If the model is not vented to the outside, the air will be recirculated through a disposable charcoal filter that helps remove smoke and odors.

The charcoal filter should be replaced when it is noticeably dirty or discolored (usually after 6 to 12 months, depending on hood usage).

To Install Charcoal Filter

When installing the charcoal filter, disconnect power at the main fuse or circuit breaker panel or pull the plug.

1 Remove the 2 retaining screws from top air grille and detach it from microwave.
2 Discard plastic wrapping from new charcoal filter and install upwards at a 45° angle.
3 Push filter inward until secured beneath the top center tabs of the filter mounting bracket.
4 Lower the filter until the bottom section is secured in place with the lower bracket tabs.
5 Replace the grille and retaining screws.

To Remove Charcoal Filter

When removing the charcoal filter, disconnect power at the main fuse or circuit breaker panel or pull the plug.

1 Remove the 2 retaining screws from top air grille and detach it from microwave.
2 Gently pull back on the lower bracket tabs and lift the bottom portion of filter upward to release it from the filter bracket and remove.
3 Follow steps listed in “To Install Charcoal Filter” to replace the charcoal filter.

<td>• Many of the oven’s features are preset and cannot be changed.</td>
</tr>
</tbody>
</table>

#### Things That Are Normal

- Steam or vapor escaping from around the door.
- Light reflection around door or outer case.
- Dimming oven light and change in the blower sound at power levels other than high.
- Dull thumping sound while oven is operating.

- TV-radio interference might be noticed while using the microwave. Similar to the interference caused by other small appliances, it does not indicate a problem with the microwave. Plug the microwave into a different electrical circuit, move the radio or TV as far away from the microwave as possible, or check the position and signal of the TV/radio antenna.

**What Mabe Will Not Cover:**

- Service trips to your home to teach you how to use the product.
- Improper installation.
- Failure of the product if it is abused, misused, or used for other than the intended purpose or used commercially.
- Replacement of house fuses or resetting of circuit breakers
- Damage to the product caused by accident, fire, floods or acts of God.
- Incidental or consequential damage to personal property caused by possible defects with this appliance.

**Read your Use & Care Material:**

If you then have any questions about operating the product, please contact your dealer or our Consumer Affairs office at the address below, or call toll free:

Consumer Information Service

**EXCLUSION OF IMPLIED WARRANTIES**—Except where prohibited or restricted by law, there are no warranties, whether express, oral or statutory which extend beyond the description on the face hereof, including specifically the implied warranties of merchantability or fitness for a particular purpose.

This warranty is extended to the original purchaser and any succeeding owner for products purchased for use in Canada. If the product is located in an area where service by a Mabe Canada Authorized Servicer is not available, you may be responsible for a trip charge or you may be required to bring the product to an Authorized Mabe Canada Service location.

Some provinces do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from province to province. To know what your legal rights are in your province, consult your local or provincial consumer affairs office.
