

MONOGRAM

Built-In Wall Oven Flush Inset Installation Instructions

Please use this information along with the normal installation instructions to achieve the flush inset installation of your appliance.

ADDITIONAL MATERIALS YOU WILL NEED

- Clean Release Masking Tape – 2" width (min)

PREPARATION

1. Measure your cabinet to ensure all dimensions match the specific flush inset requirements for your model (see chart).
2. Apply Clean Release Masking Tape to all cabinet faces for protection while installing the unit. For each edge of the cabinet opening, start tape 1/2" in from cabinet face and wrap around front face to protect edges. Ensure tape extends around the entire opening - top, bottom, and both sides.

INSTALLATION

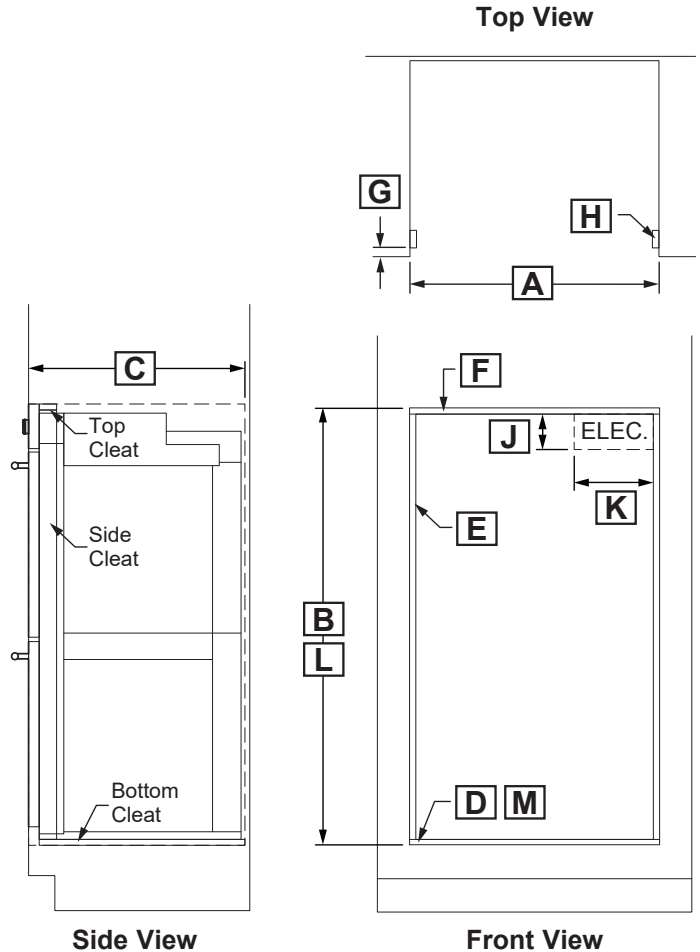

1. Follow main instructions for product installation.
2. Remove Clean Release Masking Tape before driving the mounting screws and trapping it in place.
3. Complete remaining steps of installation.

1. Bottom trim flush installation

2. Extruded aluminum trim flush installation

Allow 1/8" clearances from side edges of oven door.

		30"			
		Single Wall Oven		Double Wall Oven	
		ZTS90DS ZTSX1DS	ZTS90DP ZTSX1DP	ZTD90DS ZTDX1DS	ZTD90DP ZTDX1DP
1. Bottom trim flush installation					
Cutout	A	Minimum cutout width with 1/8" side reveals
